Labrador base template v0.1 - shape review

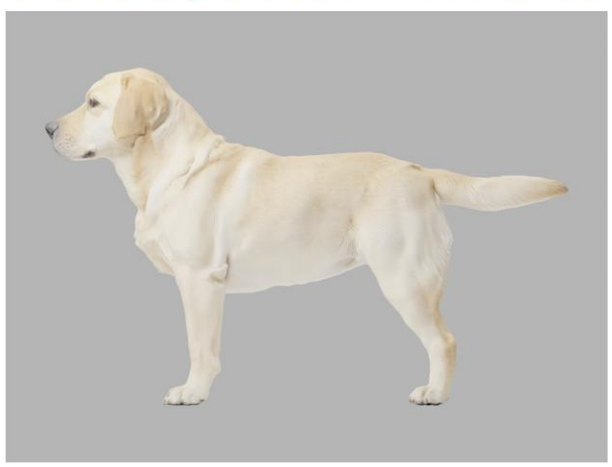

Approve the shape before seams are drawn. Real-size model (withers 56 cm); the plush is scaled down per order size.

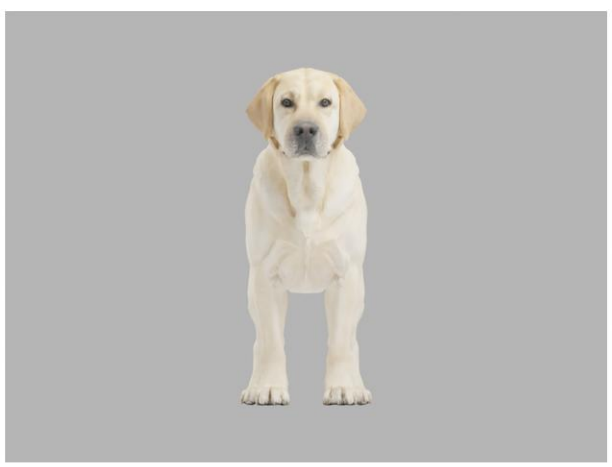

1. Reference views (generated, checked against real Labrador photos and the Kennel Club standard)

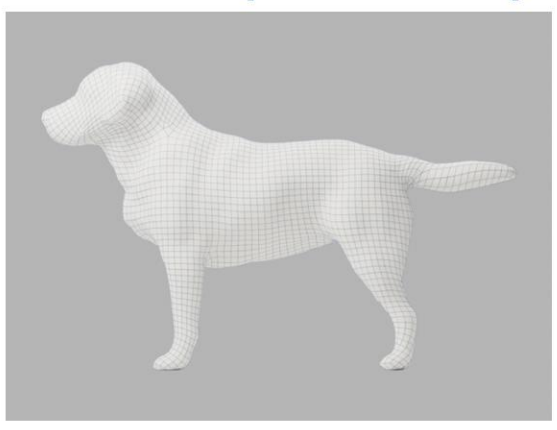

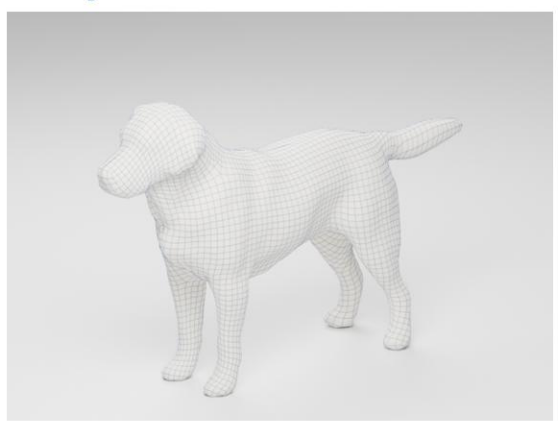

2. 3D shape made from the references (Tripo H3.1 multiview)

3. Plush-shaped base template: symmetrical, smoothed, toes/mouth closed, flat soles, 4,928 faces

4. Checks

Measure	Template	Reference	Difference	Target	Result
Body length / height (side)	1.21	1.20	+0.5 %	within 3 %	**PASS**
Chest depth: brisket height / height	0.43	0.43	-1.8 %	within 3 %	**PASS**
Head + neck reach / height	0.34	0.34	-0.9 %	within 3 %	**PASS**
Chest width (front)	0.36	0.35	+2.8 %	within 7 %	**PASS**
Leg spread (front)	0.32	0.33	-5.7 %	within 7 %	**PASS**
Head width incl. ears (front)	0.34	0.37	-7.3 %	within 7 %	**RECHECK***
Real Labradors in photos: length / height	1.21	1.22-1.30	compact end	1.07-1.27	**PASS**
Symmetry (largest left/right mismatch)	0.0 mm	-	-	<= 0.5 mm	**PASS**
Closed, sewable surface (no holes)	yes	-	-	yes	**PASS**
Mesh: faces / quads	4928 / 98 %	-	-	4,000-6,500	**PASS**
Legs / tail width at medium plush (35 cm)	legs 17 mm, tail tip 11 mm	-	-	>= 25 mm (default)	**DECIDE****

* Ears are merged into the head on this template; they become separate flat pieces at the seam stage. Head width is re-checked with ears attached.

** At a 35 cm plush, Labrador legs would be 17-23 mm wide and the tail tip 11 mm. Suggested fix: make legs fuller side-to-side only (side profile unchanged) and give the tail a fuller tip, scaled per order size. Please confirm the narrowest leg/tail tube the craftsman can turn and stuff.

Next after approval: sitting and lying poses from the same template, stretch test into bulldog / pug / dachshund / greyhound shapes, then seam layouts.
